

## **PROJECT AND BENEFICIARIES**

<b>Name of Project</b>	:	<b>Public-Private School Partners for Quality Education</b>
<b>Implementor</b>	:	Aklan State University – TEC Aklan Central Institute (ACI)
<b>Beneficiaries</b>	:	Students and teachers of Central Institute, Makato, Aklan

### **About the Project**

This partnership for quality education is a result of the experiential learning exposure of our field study students in various elementary and secondary schools in the district of Makato. Aklan Central Institute, being a private school, where maintenance and operation expenses come from meager miscellaneous fees of the students and subsidy from the government hardly could attract quality professional teachers for reasons of financial incapability. Many of their teachers are non-board passers who lack the necessary skills of professional teachers. Their students too are remnants of those who have qualified in better schools. Thus, this public and private schools partnership for quality education is presented to help students and teachers access to better educational opportunities and experiences. Being partner for quality education we shall be sharing resources and capabilities.
